Midget Nipper™

- a simple nail cutting solution

By one-hand easy operation

You can make it Easy & Safe!

1. Flush Cut by angled blade

After flush cut, you can place the new lumber without removing the old nails. This is how quickly you replace the fascia board.

2. One Hand Easy Cutting

With traditional cutters, you are struggling with the old nails on the ladder. It's very dangerous. This Bolt Cutter-like design gives much better leverage and cuts so easily. You can cut 16d galvanized dip nail.

3. Spring loaded handle

Speed-up your cutting work, like 1. 2. 3!
Spring loaded handle keeps you going.

Be Safe on the ladder
